Internet Of Things (IOT)

Most Importanat applications of IOT

HEALTH

TRAFFIC MONITORING

AGRICULTURE

HOSPITALITY

AUTOMATIC HOME

Summary

The term **Internet of Things** generally refers to scenarios where network connectivity and computing capability extends to objects, sensors and everyday items not normally considered computers, allowing these devices to generate, exchange and consume data with minimal human intervention.
Setting

Where did it happen?

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.

How about when??

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.

Incididunt ut labore et dolore.

Consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.

Lights&Curtain

Smart Appliances

Central AC

Smart Media

Air Control

Video Intercom

Background Music

Safeguard

Central Heating

SMART HOME
It is also the application of **IOT**.

SMART HOME

How IOT implemented at Home ?

Applications of IOT-enabled connectivity are Home Security,air quality monitoring, infotainment delivery, smart look .

Home Automatic Sensors

Temp: Sensor

Light Sensor

Air composition sensors.

The Internet of things (IoT) describes the network of physical objects "things" that are embedded with sensors, software, and other technologies for the purpose of connecting and exchanging data with other devices and systems over the Internet.

IOT Connected Medical Devices

Remote temperature monitoring for vaccines.

Medical data transferring tools.

Air quality sensors.

Drug effectiveness tracking.

Sleep monitor.

THANK YOU
